Erin Sandra Christopher Contributions

Investigated data quality issues and documented findings.

Contributed to exploratory data analysis documentation and interpretation.

Developed the data pipeline diagram.

Huyin Song Contributions

Established and maintained the project repository structure.

Implemented dataset loading and preprocessing procedures.

Examined dataset structure, data types, missing values, and duplicate records.

Removed irrelevant and target-leakage features from the dataset.

Performed additional data validation, cleaning, and transformation tasks.

Investigated invalid values, abnormal values, and outlier behaviour.

Implemented categorical encoding and feature preparation procedures.

Conducted feature correlation analysis and churn distribution analysis.

Assisted with project documentation and report preparation.

Shared Responsibilities

Dataset selection.

Problem definition.

Project planning and task allocation.

Review and validation of analytical results.

Final report preparation and submission.

Declaration

We confirm that the contributions described above accurately reflect the work undertaken by each team member during Phase 1 of the ENGE707 Data Engineering and Machine Learning Pipeline Project.

Erin Sandra Christopher (30/08/2026)

Huyin Song (30/08/2026)
